

EUROSHIELD®

THE SMART CHOICE IN ROOFING

THE EUROSHIELD® ADVANTAGE

- 1) **It Looks Great!** Beautiful and durable Euroshield® recycled rubber roofing is offered in 3 colours and 2 profiles, EuroSlate/EuroShake, the original thicker “tongue-and-groove” locking panel, and Harvest Shake/Beaumont Shake/Heritage Slate, a thinner, lighter lower cost option. A Euroshield® roof will add a lifetime of value to your home.
- 2) **Best Hail Impact Protection.** All Euroshield® products are UL2218 Class 4 impact rated, the highest standard you can test to. Furthermore, we hold a “Listed/Labeled” 3rd party accreditation with QAI Labs (Canada/USA) and our products are recognized by the Texas Dept of Insurance, State Farm and others for maximum discounts on homeowners insurance where applicable. Now with 2” Hail Warranty Coverage.
- 3) **Environmentally Friendly.** Euroshield® rubber roofing is comprised of 95% recycled content, the bulk of which is tire-derived rubber (70%). We use in excess of 27,000 lbs of crumb rubber daily at our facility in Calgary, Alberta, tires that are diverted from landfill to provide value to consumers.
- 4) **Tough Stuff.** Euroshield® roofing products are maintenance free and have colour throughout so there is no coating to wear away, fade or peel. You can walk on a rubber roof without risk of damage to the roof.
- 5) **Lightweight.** Euroshield® rubber roofing ranges from 210 to 340 lbs per Square and it is comparable to asphalt shingles for weight on the roof. No special requirements for roof reinforcement are required.
- 6) **It’s Affordable.** Euroshield® products provide great long term value and are among the lowest cost permanent roofing solutions available. Call for pricing.
- 7) **Easy to Install.** Euroshield® comes in panel form and can be installed as fast as asphalt shingles by experienced roofers. A layout pattern is provided for each mold and a comprehensive guide and video is available for download from our website at www.euroshieldroofing.com.
- 8) **Transferable Lifetime Warranty.** First 50 years are non-prorated. See website for details.
